Relevant Experience

LCM UK

Volunteer Web Content Analyst

February 2025 – till date

- Project manager for the design of a new charity website. Responsible for front end development, in-web chatbot training, webpage wireframing, logo rebranding, content payment plugin design, live deployment and live backend management.
- Tools used include WordPress Beaver builder and Elementor, Figma and Uizard for prototyping. Adobe Illustrator, Lightroom for logo design and image edit. Adobe After Effects for Motion Graphics design. ChatGPT chatbot plug-in, SEMrush, Jira for project team coordination.

LRSDx UK

Freelance Research Analyst

September 2024 – February 2025

- Assisted Dr Anyaduba from Imperial College London to clean, process, analyse and visualize temperature readings from bio-statistical datasets on thermal-sensitive storage. Patent pending for co-contribution to innovative findings.

University of Huddersfield Business School, UK

AI/Machine Learning Scientist

March – August 2024

- Extract, analyse, visualise, and develop commercial models off large datasets for assessing AI implementation risk on carbon transition in supply chain using Python, R, and SQL. Fix coding errors, ensure data accuracy, and consistency. Implement ACID principle to maintain data integrity.
- Present accurate dynamic dashboard report insights underscoring risk and business impact to all stakeholders. Leveraged interpersonal skill to work collaboratively with stakeholders, technical staff, academic supervisor, and multi-disciplinary research team for GDPR-compliant research design, analysis and monitoring.
- Deliver written report and technical research findings for decision making and publication. Conduct supply chain market research, maintain up-to-date knowledge of sector policies, market trends and patterns.

VENT Finance, Madrid, Spain

Digital Finance Content Analyst

March 2022 – August 2023

- Develop and maintain finance and credit risk compliance frameworks in line with the EU MiCA, UK GDPR and US SEC laws. Lead and partner collaboratively with external stakeholders and multifunctional teams to help secure third-party partnerships with [Meta](#) and [Gamium](#).
- Organise creative multifunctional teams design of content calendar, prepare periodic analysis report on

community portfolio management and project insight.

- Led content team to implement analytics insights and grow DeFi customer community size by 57% to 110,000.
- Satisfy customer inquiry and ticket raises. Update evergreen FAQs, how-to articles, and help desk in line with new SEO trends.

 **DoNotPay, San Francisco, CA, USA.**

May 2021 - March

2022 Copywriter, Content Writer and Analyst

- Independently achieved 96% domain authority in over 100 keywords eclipsing top keyword competitors like RocketLawyer, LegalZoom and Nolo.
- Wrote, edited, and optimized organic SEO-compatibility for over 50% of 430 published evergreen articles satisfying specific user intent, leveraging quality internal backlinking, and targeting long-tail keywords.
- Grew organic monthly visitors from 20,000 to over 500,000 in seven months.
- Smashed a personal copywriting and content writing record of half a million SEO-optimized word count leveraging ProWritingAid, AnswerThePublic, and MarketMuse.

 *Gaps in employment relate to periods of engagement in other non-relevant work experiences including breaks for volunteering and intentional self-development.*

Education

 **University of Bradford**

MSc Applied Artificial Intelligence and Data Analytics (with Distinction) UK Office for Student (OfS) Scholar

Researched Cost-Effective Fraud Risk Modelling, Detection and Prevention Using Generative AI.

Identified fraud points around card payment processing using Generative Adversarial Network (GAN). Researched behavioral theories of fraud, imbalance data treatment, data architecture, rule-based/ML- based and hybrid fraud prevention methods.

Tools SQL, R, Python: Tensorflow, FastAPI, and Python ML libraries. Google Suite, Microsoft Office 365, and Tableau.

University of Port Harcourt

BSc Business Management (Business, Economics, Statistics and Finance)

Best Graduating Student, Department of Management

Sam Mbatam Award for Best Graduating Student

Transferable Skills and Competencies

Attention to detail, Communication skills honed as a professional technical writer, researcher, and content analyst with over +1,000,000 professional word count spanning five years.

Gained deep knowledge of Machine Learning Models and Libraries at the University of Bradford Computer Science Department. SQL, Excel and Python for information extraction, dashboarding, visualization, research and report writing at the University of Huddersfield.

Critical thinking, creativity, and excellent analytical problem-solving skills enhanced through McKinsey Forward. Strong organization skills, time management, and prioritization ability are evidenced in the combination of multiple coursework, student volunteering, dissertation thesis, group ML task, and personal development. Stakeholder management and collaborative team working experience gained from managing cross-functional creative teams at VENT, college group tasks, classical choir membership and volunteering.
